

CHIROPRACTIC STUDENTS' PERCEPTION ABOUT INTERDISCIPLINARY COLLABORATION

Principal Investigator: Cheryl Hawke, Logan Chiropractic College; Co- Investigator: Jerrilyn Cambron, D.C., M.P.H., Ph.D.

The purpose of this observational cross-sectional study is to assess the attitudes of chiropractic students toward interdisciplinary collaboration by means of the "Interdisciplinary Education Perception Scale". The secondary purpose is to serve in pilot-testing the administration protocols for a larger study which will include naturopathic, massage, acupuncture, osteopathic, medical and nursing students as well as chiropractic students (H-1108).
