

MESSAGE THERAPY RESEARCH NETWORK (MessageNet) DEMOGRAPHIC SURVEY

[Principal Investigator: Jerrilyn Cambron, D.C., Ph.D.]

The purpose of this project is to initiate an innovative multi-site, multi-state practice-based Massage Therapy Research Network that will ultimately expand the body of knowledge in the massage profession and establish mechanisms to ensure that new knowledge is translated back into practice. The design of this project includes development of the infrastructure of the MessageNet including information technology, logistical procedures and channels of communication along with an initial demographic survey of massage therapists.

Funding: Massage Therapy Foundation
