

## **ACADEMIC LIBRARY USAGE CONTRIBUTES POSITIVELY TO STUDENT ACADEMIC SUCCESS**

Principal Investigator: Patricia Genardo, M.L.I.S.

Research has shown library usage can lead to higher achievement in GPA for the student. The NUHS Library would like to conduct preliminary research to determine if this is valid for our students. Student usage (both online and brick and mortar) will be tracked for one trimester. Number of interactions will be compared to cumulative GPA to provide a baseline of library data.

Funding: CARLI Counts
