

SURVEY OF MEDICAL CONDITIONS OF CLIENTS ATTENDING A MassageNet THERAPIST PRACTICE

Principal Investigator: Jerrilyn Cambron, D.C., Ph.D.

This survey will ask members of MassageNet (a Massage Therapy Practice Based Network) about client histories taken and what types of medical conditions clients may have. The purpose is to determine what primary care conditions massage clients have and how therapists are made aware of these conditions. The information may be valuable to the massage profession in terms of training therapists on client medical history and massage contraindications.

Funding: Internal
