

AN INTERPROFESSIONAL COMPENDIUM OF COMMONLY MISUNDERSTOOD SPINE CARE TERMINOLOGY: RESULTS OF A MODIFIED-DELPHI CONSENSUS PROCESS AMONG INTERNATIONAL SPINE CARE PROVIDERS

Principal Investigator: Claire Johnson D.C., Ph.D.

The objective of this study is to develop a compendium of spine care terms that are unique and commonly misunderstood among different healthcare professions. This study will use a modified Delphi process. Experts in spine care representing a variety of healthcare professions will complete several rounds of consensus processes. Commonly misunderstood spine care terms that are unique among different healthcare professions will be collected and reviewed from multiple profession. This study will use a modified Delphi process.
