LIFELONG LEARNING COMPETENCIES FOR THE CHIROPRACTIC PROFESSION: INTERNATIONAL CONSENSUS STATEMENT FROM A MODIFIED-DELPHI PROCESS

Principal Investigator: Claire Johnson D.C., Ph.D.
Co-Investigator: Bart Green D.C., Ph.D.

The purpose of this consensus process will be to identify core competencies essential to lifelong learning for members of the chiropractic profession and to describe action steps to implement them. The research questions include what core competencies are needed for lifelong learning for chiropractors, what competencies should chiropractors continue to develop throughout their career and what infrastructure and resources are needed to support lifelong learning for chiropractors This study will produce a consensus document that describes lifelong learning competencies for the chiropractic profession. Recommendations aim to inform accreditation standards, guide continuing education program development, and shape individual professional development plans.
