HD CONNECT: METAHEALTH PROFESSIONAL EMPOWERING PATIENTS AND CAREGIVERS THROUGH THEIR JOURNEY

Principal Investigator: Atsusi Hirumi, Ph.D.(Univ Central Florida)
Co-Investigator/Faculty Sponsor: Chris Olsen M.S.

The purpose of this project is to design and refine a prototype mHealth application for individuals with Huntington Disease (HD) and their caregivers. NUHS investigator will work with the lead site to review prototype materials, provide instructional design and learning experience feedback to improved clarity, accessibility, and usability and participate in design discussions to inform iterative refinement.
